

Virtual Revenue Solutions

*Enhancing your A/R Management*

## The Leading Revenue Cycle Management Solution for Centricity™ Clients

Declining reimbursements have become an unpleasant trend, while internal pressures and industry-driven challenges add to shrinking profits. Providers are struggling to balance time between managing administrative burdens and spending quality time with their patients.

Like most physicians, are you finding it more difficult to increase your practice profitability?

Virtual Revenue Solutions (**VRS**) is a sister revenue enhancement organization to Virtual OfficeWare Healthcare Solutions.

**VRS** offers a variety of deliverables and provides personalized guidance, supporting best practices.

Improve control of your revenue capture and maintain a healthy, profitable future.

### Is it time for an alternative?

The bad news is, the complexities of managing billing and A/R continue to rise. The need for dedicated, highly trained staff is at a premium. Multi-tasking, turnover, and other factors all can have a negative impact on cash flow and A/R days. Detailed reporting and data demands often go beyond the capacity of your practice.

The good news is, we can help! Our Revenue Cycle Management (**RCM**) deliverables are designed to meet your specific needs. Our services utilize the GE Healthcare's Centricity PM and EHR platform, providing a seamless integration with your existing Centricity workflows.

### If you are experiencing:

- Inefficient internal billing process
- High staff turnover
- New providers
- Costly billing technology and staff training
- Decreased patient focus -- administrative tasks stealing too much of your time

### Then, **VRS** can provide you with these big advantages:

- More focus on patient care
- Trained billing specialists
- Fewer billing errors/claim rejections
- Cost savings
- Improve cash flow
