

Advanced Scheduling

Scheduling Patient, Group and Recurring Appointments just got a lot easier to manage!

Benefits of Advanced Scheduling:

- ◆ Schedule multiple patients into a single slot for group appointments
- ◆ Set daily, weekly or monthly recurring appointments
- ◆ Block out appointment slots across your practice for important future occurrences (*holidays, training, events, etc.*)
- ◆ Manage with ease schedule templates and template recurrence
- ◆ View and track trends on patient and group appointment histories
- ◆ Record and audit patient attendance

We have expanded functionality on Centricity™ Practice Solution's schedule component providing improved capabilities that better accommodate common and unique scheduling needs.

Integrated Innovation

Advanced Scheduling is seamlessly integrated with Centricity. It's bi-directional interface enables data to be communicated between systems so you work in one place. The integration allows front desk staff to check-in, check-out, create batches and collect/post patient payments back to Centricity with just a couple clicks of the mouse.

It's cross-functional design eliminates redundancy and provides users a faster and smarter way to schedule patients. You will accomplish more in less time and more efficiently.

Advanced Capabilities

Scheduling Group, Patient and Recurring Appointments has never been easier to manage! Schedule multiple patients into a single slot to create group appointments. Bulk apply appointment and physician schedule templates in a single instance.

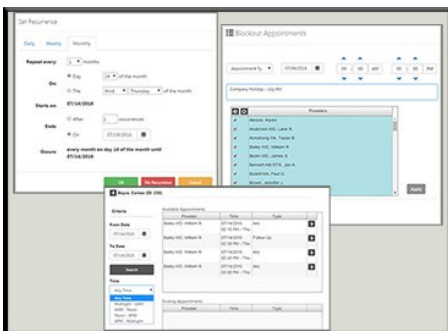

Use intuitive and drill-down logic to filter through data to help schedule patient appointments.

Recurring appointments and "block out" appointments are valuable assets of this tool! Schedule ahead to ensure no appointment dates are missed. Save time by simply scheduling a number of appointments at once using the recurrence feature.

Resource appointments can easily be scheduled using the "block out" functionality. Be proactive with your physician schedules, utilize the recurring platform and block out slots for known events like holidays, company meetings, vacations, etc.

Data sources function in real-time so you are always connected to live schedules within Centricity to view case information and basic demographics. Record and audit patient attendance and utilize the archive feature that captures patient and group appointment history. Easily track and trend historical data for your analysis and reporting needs.

Managing time is essential to running a productive and efficient practice. The added capabilities within Advanced Scheduling will help you stay on track and heavily reduce scheduling conflicts. Quickly automate, within seconds, labor-intensive functions that consumes many hours of your time. ◆
