

athenaTelehealth™

Meaningfully engage patients and deliver essential care from wherever you are

Easily facilitate HIPAA-enabled telehealth visits right from athenaNet

There's no additional software or integration required to get started. Simply go through a quick enrollment process and we'll turn the service on for your practice.

Minimize practice disruption with seamless, integrated workflows

Complete a full telehealth visit workflow—appointment scheduling, patient outreach, video conferencing, encounter documentation, and billing—without leaving athenaNet. Scheduling a telehealth visit drives all downstream workflows automatically.

Delight patients with a simple, flexible experience

Patients can access telehealth consultations from any computer or mobile device with a web browser and integrated camera. athenaTelehealth expands upon athenaNet's existing email and text messaging channels for a seamless patient experience.

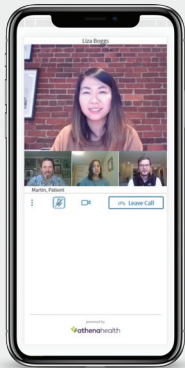

Sustain schedule density with billable telehealth visits

Full integration with athenahealth's revenue cycle services allows for a streamlined billing process. Embedded workflows enable providers to move between appointments quickly and efficiently.

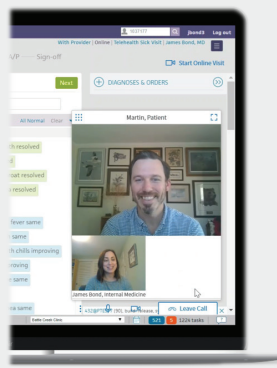

Key features include:

Group video conferencing

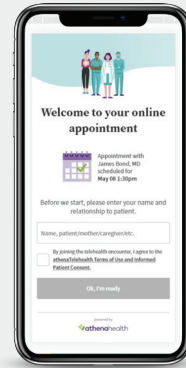

Include **up to four** simultaneous participants in video conferences.

Floating, resizable video window

Document encounters while **maintaining focus on the patient.**

No downloads required

No additional software or integration is required, and patients can join visits with any **web-enabled device** with an integrated camera.
