

practice medicine on the go

Introducing a new way for practices to go mobile that puts the information clinicians need at their fingertips.

In most industries, professionals can get meaningful work done on their mobile device as often as their laptop. Shouldn't clinicians be able to do the same? athenahealth's new athenaOne mobile app is simple, easy-to-use, and gives clinicians unparalleled access to information whenever they need it, wherever they are. More than just access to information, the mobile app is an extension of our EHR. It offers seamless integration with our clinical workflows, lets you create and sign orders, send majority of prescriptions, respond to patient cases and more – all from your iPhone or iPad.

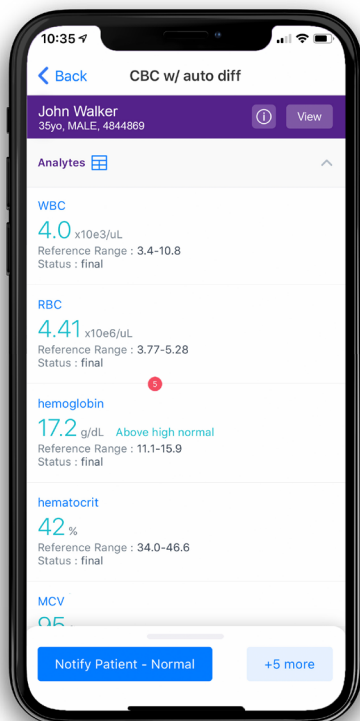

Customizable and intelligent, the mobile app learns from your most frequent behaviors to speed up documentation. Whether you're prepping patient charts before your day, taking call from a soccer game, or reviewing labs with your patient during an exam, the athenaOne app gives you the flexibility to practice medicine your way.

Intuitive home page

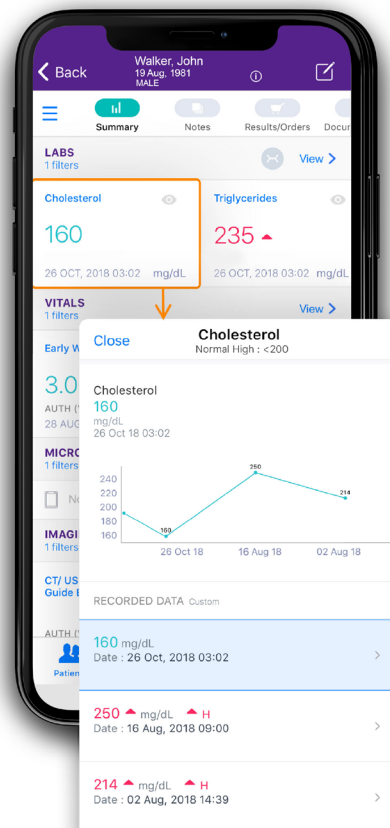

*Integrates real-time
into athenaOne*

User-friendly, actionable inbox

Detailed patient records

What's holding clinicians back?

How many physicians do you know who feel burned out? And how many blame technology? We believe the right technology can help physicians, not hinder them. So, we reimagined the way physicians engage with their EHR.

27%

of a physician's workday is spent on
direct clinical face time
with patients*

49%

of a physician's workday is spent on
EHR and desk work*

44%

of physicians acknowledge some
degree of burnout*

Less work. More flow.

**These features will reinvent
how you practice medicine.**

Actionable inbox

View schedule and prep patient charts

Document the patient encounter

Capture images directly into the chart

Queue and place orders

Embedded into athenaClinicals,
the app syncs in real-time

**"On call...I'm able to access all [the] patient's
information via my smartphone. It's the
difference between being an informed physician
and being an 'I hope I'm informed' physician."**
