ONC 2014 Certified

In March 2014, GE released Centricity Practice Solution (CPS) 12.0 to support eligible provider participation in CMS quality reporting programs and enable a smooth transition to ICD-10 problem management.

CPS 12.0 is a certified 2014 ONC product as listed on the Certified Healthcare IT Product List (CHPL)

New Online User Communities

CCC Basic was introduced alongside CPS 12.0 as a GE Healthcare-provided starter set of forms designed to optimize the clinical data capture required for CMS quality reporting programs.

The most recent supported CCC Basic Package for CPS 12.0 is CCC 1.4

Link to the Clinical Content Service Portal for full documentation

CCC Basic

Home

CCC Basic also includes a subset of forms built using HTML 5 technology for immunization management, medication administration, and care planning.

Infobutton

Infobuttons are an HL7 driven standard to provide a context-aware retrieval system to request clinical knowledge from online resources.

GE's Infobutton is powered by Truven Health Analytics® including patient education & clinical references for decision support and can be found in relevant portions of the chart and update dialog boxes.
