Clinical Document Exchange – available now!

Clinical Document Exchange automates the retrieval of patient medical information from the provider to the payer for a variety of patient populations

Key benefit: Increases efficiency by eliminating manual chart chases

Payer Insights – available Q4 2017

Payer Insights is an electronic cloud based solution that presents Diagnosis and Care gaps to the providers directly in the EMR

Key benefit: Enhances care quality and strengthens financial performance through timely sharing of key clinical information between payers and providers
