

CPS 12.3 Chart Module Highlights

CPS 12.3 Upgrade Community

The screenshot shows the 'CPS 12.3 Upgrade Community' page. At the top, there's a navigation bar with 'GE Healthcare', 'Find Communities', and 'Find Members'. Below this, the page title 'CPS 12.3 Upgrade Community' is displayed, along with 'Share' and 'Following in 2 streams' buttons. A secondary navigation bar includes 'Overview', 'Content', 'People', 'Subspaces and Projects', and 'Calendar'. A 'Community Message' section contains a notice about the update to General Release and a link to 'End Support Reminder: Centricity™ Practice Solution 11 and Prior'. Below this is a 'Recent Webinars' section with a 'Ready, Set, Upgrade' banner. The banner lists eight topics: 'What's New', 'Technical Planning', 'Setup & Train', 'Upgrade Checklists', 'Schedule Upgrade with GE Healthcare', 'CMS Quality Reporting', 'Centricity Value Added Services', and 'GE Healthcare Support & Resources'. At the bottom, an 'Upcoming Events' table lists three webinars.

Date	Event	Type
11/3/2017	Webinar: Refresh: What's New in Centricity Practice Solution 12.3: Claim Module	Virtual
11/8/2017	Webinar: Refresh: What's New in Centricity EMR 5.10	Virtual
11/7/2017	Webinar: What's New in Centricity Practice Solution 12.3	Virtual

All webinars in one place

<https://engage.gehealthcare.com/community/en/cps/cps-123-upgrade-community>

CPS 12.3 Is ONC Certified

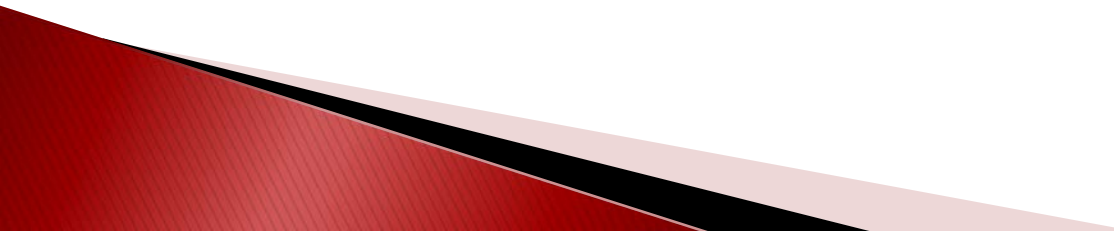

CPS 12.3 is the first GE Healthcare certified 2015 ONC product as listed on the [Certified Healthcare IT Product List](#) (CHPL)

CPS 12.3 is also available for use for 2014 ONC quality reporting

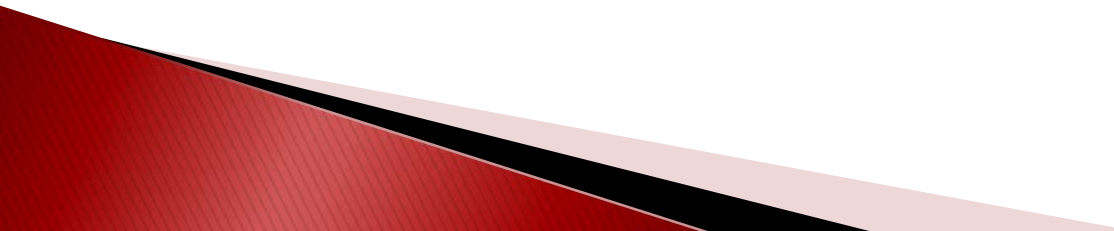

Azure Directory

Microsoft's Azure AD is a cloud-based directory and identity management system designed to protect information exchanges. For this release, when you attempt to access the Centricity APIs to generate CCDA documents, Azure AD verifies that you and others within your organization are authorized to do so.

API's

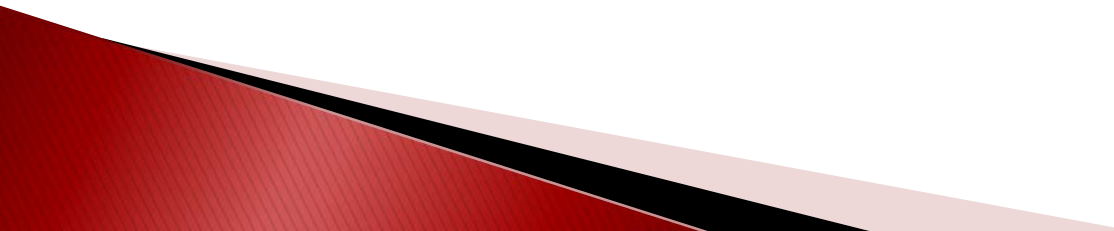

In computer programming, an application program interface (API) is a set of routines, protocols, and tools used to build software applications and promote cross-system interactions. These 'messenger' components execute user requests across systems and servers external to your on premise Centricity application, allowing them to collaborate. In simpler terms, APIs take requests to perform actions, convey requests to external systems and servers, and then return the actions requested.

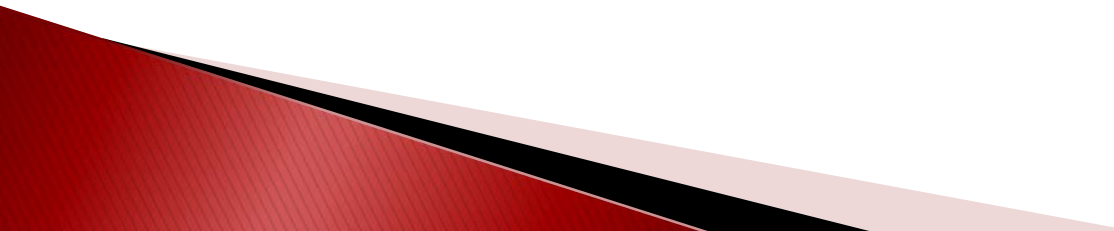

Azure Directory + API

When a provider makes a request in a Centricity system to generate a transition of care document. The clinic server relays the request to Azure AD, which authenticates access to the API server.

If authentication is successful, the API server is accessed and supporting CCDA 2.1 APIs are retrieved. The APIs 'place the order' within the Centricity system to generate the transition of care document and generates the requested file. In this way, Azure AD provides the layer of security required to ensure secure healthcare information exchanges.

Enhancing Connectivity

- ▶ GE API Technology supports Requirements for CDA 2.1
 - Clinical Visit Summaries
 - Transitions Of Care
 - CDA Exports
 - Activate Patient Access
 - ▶ Provides the level of security and authentication required to support healthcare IT solutions.
 - ▶ Azure and GE API Technology meets ONC regulations to support advanced and secure healthcare information transfers.
 - ▶ The current 1.1 format is the default CCDA version upon upgrading until you switch to the new format.
- 

Required For CPS 12.3 and CEMR 9.12

- ▶ Active Directory for user authentication
- ▶ Azure Subscription:
 - Business-to-Business (B2B) Azure Active Directory (AAD)
 - Azure AD Connect installed on AD servers
 - To sync onsite Active Directory users to your Azure AD

Free subscription available. Details at:
azure.microsoft.com
engage.gehealthcare.com

Implantable Device Form

New for Centricity™ Practice Solution 12.3 and Centricity EMR 9.12

- Not backwards compatible
- In support of ONC criteria 170.315(a)(14)
- Introduces new scanning and import capabilities for device IDs (*Set up required*)
- Information is included in CCDA 2.1

Implantable Devices

- ▶ Joint Replacement
 - ▶ Pacemakers
 - ▶ Stents
 - ▶ Breast Implants
 - ▶ IUD's
- 

New Terminology

GUDID: Global Unique Device Identifier Database

UDI: Unique Device Identifier

- Comprised of the Device Identifier (DI) and the Production Identifier (PI)

DI: Device Identifier

Mandatory, fixed portion of the UDI that identifies the specific version or model of a device along with the labeler

PI: Production Identifier

Conditional, variable portion of a UDI that identifies one or more of the following:

- Lot or batch number
 - Serial number
 - Expiration date
 - Manufacturing date
- 

Implantable Device Form

- Add, view and remove devices
- Unique Device ID scanning with the ability to record in formats established by all three UDI issue agencies using data obtained from AccessGUDID website. Three UDI issue agencies format include
 - GS1 Issuing Agency
 - Health Industry Business Communication Council (HIBCC) and
 - International Council for Commonality in Blood Banking Automation (ICCBBA)

Implantable Device Icon

The screenshot displays a medical software interface for a patient named Amy Sebesta. The interface includes a top menu bar with options like File, Home, and Options. Below this is a toolbar with various icons for finding patients, adding notes, prescriptions, and alerts. The main content area is divided into several panels:

- Patient Information:** Amy Sebesta, 9 Years, 1 Months, Female, DOB: 22-Sep-2008, Home: 343-242-3444. Resp. Provider: Patient ID: 5920.
- Problems:** A table listing medical problems with columns for Description, ICD-9, ICD-10, Onset Date, End Date, and Entered.
- Medications:** A table listing medications with columns for Description, Instructions, Route, and Last Rx.
- Allergies:** A table listing allergies with columns for Substance, Reaction, Criticality, and Cate.
- Directives:** A section for medical directives.
- Alerts / Flags:** A section for alerts and flags, showing messages from Rhea Davis and Andrew P.

A red box highlights an implantable device icon in the top right corner of the interface.

Family History

- Adds new HTML5 technology
 - Originally Introduced in CPS 12.2 and CEMR 9.10)
 - Maps to SNOMED codes instead of obs for Quality Reporting support via Mel_ADD_FHX
 - Improves data collection speed, user experience, updated look-and-feel
 - Customizable at server level instead of workstation
- 

Family History

- Preload previously entered data upon launch
 - Family and Social History are separated to enable flexibility to use one or both form sets
 - Checkbox for family history review is automatically checked updating the MU core checklist
- 

Family History Step 1

Step 1, 2, 3 approach to data entry.
First select the applicable conditions if there is
a history of

Family History

☐ Unknown family history ☐ No known primary family members ☐ No family history of significant medical conditions

1. Select Conditions

2. Select Family

4. Review & Edit Family History

Select Specialty: Obstetrics/Gynecology

- **Current Smoker:** A person who has smoked 100 cigarettes in his/her lifetime and currently smokes cigarettes every (daily) or some days (not daily) periodically but consistently.
- **Heavy Tobacco Smoker:** A person who smokes more than 25 cigarettes per day or an equivalent quantity of cigar smoke.
- **Light Smoker:** A person who smokes less than one pack per day, less than fifteen cigarettes per day, less than ten per day, and 1-39 cigarettes per week. Light smokers include low-rate daily smokers (fewer than 5 cigarettes per day) "chippers" who consistently smoke equal to five cigarettes per day on the days when they do smoke.
- **Former Smoker:** A person who is 18 years or older who reports having smoked at least 100 cigarettes in his/her lifetime who does not currently smoke.
- **Never Smoker:** A person who has never smoked a cigarette or who smoked fewer than 100 cigarettes in his/her lifetime.
- **Unknown if ever smoked:** A person whose smoking status is unknown.

Pediatric Dosing [back to top](#)

[View Detailed information in DRUGDEX](#)

Important Note

- Orphan drug designation: Treatment of methanol or ethylene glycol poisoning

General Dosage Information

- safety and effectiveness in pediatric patients have not been established

Dose Adjustments [back to top](#)

[View Detailed information in DRUGDEX](#)

- hemodialysis (before hemodialysis): if less than 6 hr has elapsed since last dose, do not give a dose; if 6 hr or more have elapsed since the last fomepizole dose, give the next scheduled dose
- hemodialysis (during hemodialysis): 15 mg/kg IV loading dose, followed by 10 mg/kg IV every 4 hr for 4 doses, then 15 mg/kg IV every 4 hr until ethylene glycol or methanol concentrations are below 20 mg/dL
- hemodialysis (following hemodialysis): if the time between the last dose and the end of hemodialysis is less than 1 hour, do not give a dose; if the time between the last dose and the end of hemodialysis is 1-3 hr, give 50% of the next scheduled dose; if the time between the last dose and the end of hemodialysis is greater than 3 hours, give the next scheduled dose
- renal impairment: in cases of renal failure, dialysis should be considered in addition to fomepizole dosing

FDA-Labelled Indications [back to top](#)

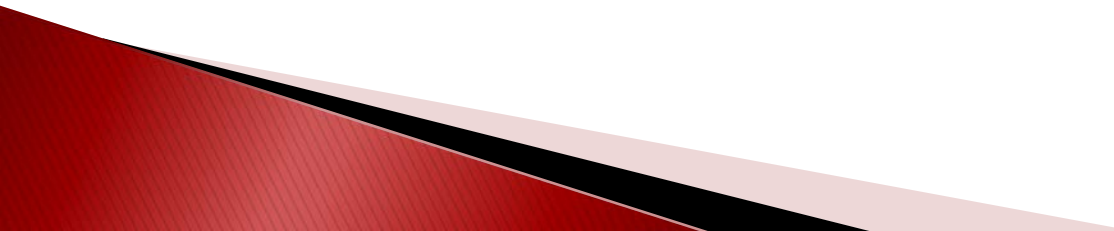

Context Specific Patient Education

By gender:

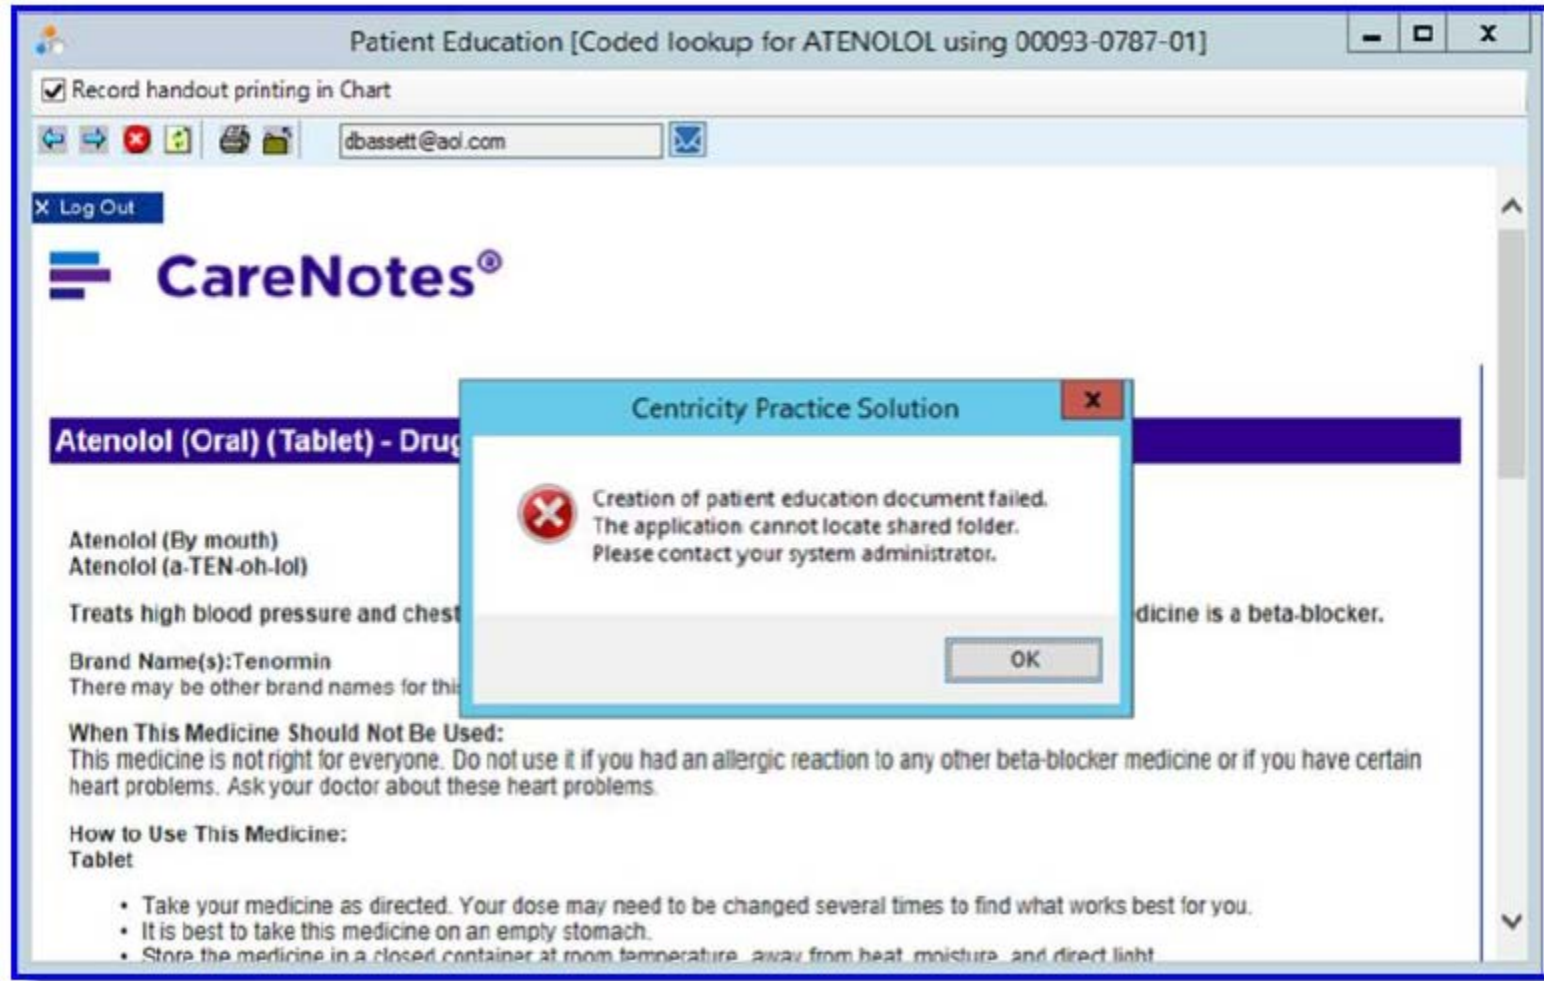

Clinical content displayed by gender is based on Male or Female designations; if the gender identified is other than these, the system retrieves information for all genders.

By age:

Clinical content displayed by age is derived from the following designations:

- Infant, newborn; birth to 1 month
 - Infant; 1 to 23 months
 - Child, preschool; 2 to 5 years
 - Child; 6 to 12 years
 - Adolescent; 13-18 years
 - Young adult; 19-24 years
 - Adult; 19-44 years
 - Middle aged; 45-64 years
 - Aged; 56-79 years
 - Aged, 80 and older; a person 80 years of age or older

Create Shared Path for Patient Education

The screenshot displays a software interface for system administration. At the top, a blue header bar contains the title "Administration" and three tabs: "File", "Home", and "Options". Below the header, a navigation bar is divided into two sections: "Main Application Functions" and "Financial Functions". The "Main Application Functions" section includes icons and labels for "Application Users", "Security by Permission", "Providers and Resources", "Activity Log", "Appointment Types", "Companies", "Facilities", "Insurance", and "Reg Maintenance". The "Financial Functions" section includes icons and labels for "Batches", "Charge Maintenance", "EDI", "Inventory", and "Transaction Column Sets".

Below the navigation bar, the main content area is titled "Chart > Patient Education Settings". On the left side of this area is a tree view under the "Chart" folder, listing various settings such as "Administered Medication Custom Lists", "Allergy Custom Lists", "Coding Requirements", "Document Views", "Drug Interaction Overrides", "Drug Interaction Exclusions", "Find Patient", "Flowsheet Views", "Formulary Management", "History Views", "Immunization Custom Lists", "Join Updates", "Medication Custom Lists", "Patient Banner", "Patient Education Settings" (which is highlighted), "Prescription Requirement", "Problem Custom Lists", "Problem List Views", and "Protocols".

The right side of the "Patient Education Settings" page features a section titled "Shared Path Location:" with a text input field. Below the input field, an example is provided: "E.g. \\172.16.254.1\SharedFolder Or \\SharedServerName\SharedFolder".
